

# Heard about Nano Eyelash Perm?

**Nano Eyelash Perm** uses high quality eyelash perm lotion made in Korea for all our Eyelash Perm. The lotion particles are nano-sized to ensure quick absorption and maximum curve. Unlike traditional curving rod with smell offensive glue, **Nano technology** uses perm clips to produce beautifully curled eyelashes instead. They are gentle yet effective and no glue is required that hurts your eyelashes when removing. They are suitable for even the most sensitive types of eyes.

We also offer 3 different types of **Eyelash Perm** to ensure that each customer can get the ideal **Eyelash Perm** they desire. Our Eyelash Specialists will suggest the best type of **Eyelash Perm** for you depending on the shape of your eyes, the length of your eyelashes, and the type of curve you prefer.

Whatever **Eyelash Perm** you choose, you can be sure that it will add a twinkle to your eyes!!!
